PROFESSIONAL EXPERIENCE

Splice Systems, Senior Software Quality Assurance Tester, 4/12 to Present

Supervise a five-member software QA testing team in developing and implementing quality-assurance and quality-control methodologies to ensure compliance with QA standards, federal regulations, and customer specifications.

Prevented hundreds of thousands of dollars in erroneous charges to Florida Turnpike drivers by identifying software bug in automated toll-collection system.

Valve, Lead QA Tester, 8/10 to 3/12

Created company's first comprehensive database of documented test defects and procedures to enable accurate replication and ensure compliance with standards.

Accelerated average QA testing turn-around time by 25% or more, allowing company to accept more testing projects without increasing staff.

Designed and implemented automated testing tools and programs addressing areas including database impacts, software scenarios, regression testing, negative testing, error/bug retests and usability.

T-Mobile, Software Developer, 8/08 to 8/10

Worked on teams developing state-of-the-art software for mobile devices, including the #3 selling GPS solution in the US

Analyzed business requirements, conducted gap analysis, estimated project scope and worked closely with fellow developers to deliver high-quality software solutions using Java, C#, VBScript, SQL and other technologies
